

"One of the brightest new ARTISTS OUT THERE!"

*Nashville Showcase Radio 2001*

"I've just listened to your CD for the third time in a row. Your music is very infectious. At least for me. I don't no what your influences are, but I hear Johnny Winter, Big Brother & The Holding Company, Grateful Dead, old black southern blues, etc. Great sound."

*Bill Neumann, Liquid Gold Entertainment*

"The Blud Bros have recorded some great music that addresses critical life issues. Their lyrics get right to the heart of the matter and really make you think about your life, what you are doing with it and where you are heading. I personally felt convicted as I listened to one of their songs. I know the Lord will use this ministry to reach the hearts of many who will come to Him."

"Great Bluesy Gospel. Your songs really sit smoothly in the blues genre and I love the way you tell His story in your lyrics. Great job."

"One of the brightest new BLUES ARTIST OUT THERE!"

*BeatleBrook Music*

"Gotta hand to you. Nicely crafted tunes. Classic sounds. Classic Blues riffs crafted into sharp little stories which address some of the more serious issues we face these days. It's Blues with a spiritual flair, and well done to boot. Listening to the album it was interesting to hear some of the messages delivered which under other circumstances might generate resistance. Clearly this artist has something to say and doing it with style! A quick listen is all you'll need to reaffirm your faith that Blues is alive and well, and living the 'good' life in the Blud Bros. music."

A group of gifted and talented musicians whose sound can best be described as "Little Feat" meets Muddy Waters with a touch of Stanley Clark and you have hit it pretty closely.

There are tasty hooks, a powerful "groove", tight musical moves and sometimes throaty, sometimes soaring vocals, which all connect to create an atmosphere of sheer joy for both the listener and the band.
